

HARSH VARDHAN PRASAD

Jamshedpur, Jharkhand | +91-8757032221 | harshvardhan7274@gmail.com | [linkedin](#) | [github](#)

PROFESSIONAL SUMMARY

Fullstack Engineer with hands-on experience shipping AI-powered features to production, integrating LLM APIs (OpenAI, Google Gemini), retrieval-augmented generation (RAG), and vector embeddings into scalable Next.js/React and Node.js applications. Strong foundation in PostgreSQL/Prisma, Redis, Docker, REST APIs, and cloud-native, serverless architectures.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL

AI / LLM Integration: LLM APIs (OpenAI, Google Gemini), RAG Pipelines, Prompt Engineering, Pinecone, Agentic AI Workflows

Frontend: React, Next.js, Tailwind CSS, Responsive UI Development

Backend: Node.js, REST APIs, JWT Authentication, MVC Architecture

Databases & Caching: PostgreSQL, Prisma, MySQL, MongoDB, Redis, NeonDB, Firebase

Cloud & DevOps: AWS, Docker, CI/CD, Serverless Architecture, Git, GitHub, Postman, Webpack

System Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks, System Design

EXPERIENCE

Full Stack Intern | Cipher Schools

Oct 2025 – Jan 2026

- Built backend services with Node.js and Express.js using MVC architecture, improving codebase modularity and maintainability
- Partnered with frontend engineers in Agile sprints, managing version control and leading code reviews via Git and GitHub to enforce consistent engineering patterns

LLM Trainer | Outlier AI

Jan 2025 – Apr 2026

- Evaluated and ranked AI model outputs against safety and quality guardrails as part of an RLHF pipeline, improving model response quality by 20%
- Reviewed and validated AI-generated code against pixel-perfect UI mockups using React and TypeScript, surfacing failure modes and edge cases to improve model reliability

PROJECTS

Vivid AI – AI-Powered Presentation Generator [Live]

Jan 2026 – Present

- Tech Stack:* Next.js, TypeScript, LLM APIs, PostgreSQL, Prisma, Electron, Cypress
- Designed and shipped an end-to-end AI feature that generates presentation content and images from LLM prompts, cutting slide-creation time by 70% for users
- Built a full-stack architecture (PostgreSQL + Prisma) with subscription billing (LemonSqueezy), a cross-platform Electron client, and Cypress test coverage to keep the AI feature reliable in production

Confido – Full-Stack Consultation Platform [Live]

Aug 2025 – Oct 2025

- Tech Stack:* Next.js, Node.js, Express.js, Firebase, Redis, Razorpay
- Built scalable REST APIs supporting 1,000+ concurrent users, covering authentication, scheduling, and booking management
- Introduced Redis caching and Razorpay payment integration, cutting DB load by 35% and improving API latency and system reliability

Journey Jolt – AI-Powered Travel Planning Application [Live]

Apr 2025 – May 2025

- Tech Stack:* Node.js, Express.js, MongoDB, Google Gemini AI API, Firebase, Auth0
- Integrated the Google Gemini LLM into a full-stack travel app to generate real-time, personalized itinerary recommendations for 500+ active user sessions
- Built secure, Auth0-authenticated REST APIs (Node.js/Express, MongoDB) for travel search and itinerary management, with design consideration for AI response latency and failure handling

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Phagwara, Punjab

Aug 2022 – May 2026

ACHIEVEMENTS

- Secured top 4% rank among 28,000+ contributors in GirlScript Summer of Code (GSSoC) 2025
- Contributed to 20+ open-source projects and built end-to-end solutions through hackathons
- Dean's List – Top 10% of students at Lovely Professional University

CERTIFICATIONS

- Agentic AI Certification | Nov 2025
- Generative AI with LLMs | Apr 2024
- Cloud Computing | Nov 2024
